The biggest naturist camping in East-Europe is located on 23 ha next to Délegháza surrounded with IV., V. and VI. lakes. The lakes were evolved as a result of gravel excavation, with pebble-type bed, and average depth between 3–5 meter. The area has favourable natural parameters, lot of green surfaces and water surface in the lakes. The largest lake (V. lake) has an extension of 40 ha, but the camp has two more smaller lakes as well. The camping has 3 beaches, 3 buffets, 2 playgrounds and sport facilities (petangue, table tennis,

beach volleyball, shuttlecock, soccer, swimming, kayaking, etc). There are pitches for short term campers but also for season or long-time leasing in the camping. Tent, caravan or smaller (mobile) house may be installed on the area. Further areas for leasing are available in limited number.

The landscape is nice, the lake and good quality air can provide ideal conditions for family holidays including fishing. There are no industrial activity around the lakes and no chemicals can reach the lakes from agriculture.

The average size of the pitches is between 70–100 m2, mainly located at the waterside. The pitches can be used by tent, caravan, motor-home or smaller (max 30 m2) mobile home can be installed (long-time pitch renting). The pitches are equipped

naturist experiences

with electricity and water connections. There are still some pitches available for long-time renting. If you rent, you may have your "own" waterside cottage !

At present we have 140 lessee families, who are also owners through their MNE membership.

This camping is naturist and open for visitors if they accept naturist lifestyle and rules. The camp is operated by and in the ownership of Naturist Oasis Ltd. controlled by Hungarian Naturists Association (MNE).

The naturist camp was established in 1983. and the level of its infrastructure is lower than a modern camping. The sanitary units (13 pcs) are equipped with cold/hot water washstands and douches, water-rinsed toilets. The units are cleaned more times a day, however its design is from the eighties. We have ballast-roads (pebble) according to the characteristics of the lake and surroundings. However all of this is set-off by the natural characteristic of the camp: big green surfaces, big lake surface and clean water.

The majority of our lessees (members) and the VIP pitches has their own waterfront with great view to the lake. Our lessees and VIP guests can reach the water for swimming or fishing through their own entry to the lake. Our lakes are not for sport-fishing, however the lakes has a significant volume of fishes: pike, sheatfish, meagre, carp, perch, bass, grass carp, etc. Fishing is free but allowed only for our members and camping guests.

If you like nature, you are naturist and don't insist on 5 stars infrastructure, you will love this camping.
